High	13
Critical	9

High-priority issues & recommendations

Reported Seller Fraud & Scams (multiple, times single) — Critical (score 0.8462, 305 records, 100% negative)

Evidence:
- 305 feedback records reference this issue (3 unique review texts).
- 100% of the associated reviews are classified as negative.
- Original categories involved: Fraud and Scam (305).

Recommended action:
Review seller verification and payment-hold controls for the transactions referenced in these reports. Sample the supporting reviews to identify whether requests for extra payment cluster around specific sellers or product types, then tighten the fraud-detection rules for that pattern.

Note: this recommendation is derived from the observed feedback patterns. It does not claim a proven root cause and makes no financial projections.

Success metric: Share of Fraud & Scam-topic feedback classified as negative, week over week.

Reported Seller Fraud & Scams (product received, seller product) — Critical (score 0.8337, 255 records, 100% negative)

Evidence:
- 255 feedback records reference this issue (3 unique review texts).
- 100% of the associated reviews are classified as negative.
- Original categories involved: Fraud and Scam (255).

Recommended action:
Review seller verification and payment-hold controls for the transactions referenced in these reports. Sample the supporting reviews to identify whether requests for extra payment cluster around specific sellers or product types, then tighten the fraud-detection rules for that pattern.

Note: this recommendation is derived from the observed feedback patterns. It does not claim a proven root cause and makes no financial projections.

Success metric: Share of Fraud & Scam-topic feedback classified as negative, week over week.

Reported Seller Fraud & Scams (payment placing, scam seller) — Critical (score 0.8272, 277 records, 100% negative)

Evidence:
- 277 feedback records reference this issue (2 unique review texts).
- 100% of the associated reviews are classified as negative.
- Original categories involved: Fraud and Scam (277).

Recommended action:
Review seller verification and payment-hold controls for the transactions referenced in these reports. Sample the supporting reviews to identify whether requests for extra payment cluster around specific sellers or product types, then tighten the fraud-detection rules for that pattern.

Note: this recommendation is derived from the observed feedback patterns. It does not claim a proven root cause and makes no financial projections.

Success metric: Share of Fraud & Scam-topic feedback classified as negative, week over week.

Reported Seller Fraud & Scams (money sent, scam took) — Critical (score 0.8233, 253 records, 100% negative)

Evidence:
- 253 feedback records reference this issue (2 unique review texts).
- 100% of the associated reviews are classified as negative.
- Original categories involved: Fraud and Scam (253).

Recommended action:
Review seller verification and payment-hold controls for the transactions referenced in these reports. Sample the supporting reviews to identify whether requests for extra payment cluster around specific sellers or product types, then tighten the fraud-detection rules for that pattern.

Note: this recommendation is derived from the observed feedback patterns. It does not claim a proven root cause and makes no financial projections.

Success metric: Share of Fraud & Scam-topic feedback classified as negative, week over week.

Reported Seller Fraud & Scams (received order, order despite) — Critical (score 0.8151, 257 records, 100% negative)

Evidence:
- 257 feedback records reference this issue (4 unique review texts).
- 100% of the associated reviews are classified as negative.
- Original categories involved: Fraud and Scam (257).

Recommended action:
Review seller verification and payment-hold controls for the transactions referenced in these reports. Sample the supporting reviews to identify whether requests for extra payment cluster around specific sellers or product types, then tighten the fraud-detection rules for that pattern.

Note: this recommendation is derived from the observed feedback patterns. It does not claim a proven root cause and makes no financial projections.

Success metric: Share of Fraud & Scam-topic feedback classified as negative, week over week.

Unresolved Customer Service Issues — Critical (score 0.7861, 337 records, 100% negative)

Evidence:
- 337 feedback records reference this issue (8 unique review texts).
- 100% of the associated reviews are classified as negative.
- Original categories involved: Customer Service (337).

Recommended action:
Sample the unresolved-support reviews to find the contact channels and issue types with the longest resolution times. Review agent staffing and macros for those queues.

Note: this recommendation is derived from the observed feedback patterns. It does not claim a proven root cause and makes no financial projections.

Success metric: Share of support-related feedback classified as negative.

Product Defect & Quality Complaints — Critical (score 0.7808, 248 records, 100% negative)

Evidence:
- 248 feedback records reference this issue (2 unique review texts).
- 100% of the associated reviews are classified as negative.
- Original categories involved: Product Feedback (248).

Recommended action:
Cluster the defect reports by product variant and compare against warranty and return data. Prioritise the variants with the highest complaint concentration for a quality inspection.

Note: this recommendation is derived from the observed feedback patterns. It does not claim a proven root cause and makes no financial projections.

Success metric: Count of unique defect complaints per product variant per month.

Repeated Delivery Delays (weeks inconvenient, delayed weeks) — Critical (score 0.7742, 252 records, 100% negative)

Evidence:
- 252 feedback records reference this issue (2 unique review texts).
- 100% of the associated reviews are classified as negative.
- Original categories involved: Operational Issues (252).

Recommended action:
Audit fulfilment processing times for the carriers and warehouses implicated in these reviews. Check whether delays correlate with specific regions or order channels, and test proactive delay notifications where lag is unavoidable.

Note: this recommendation is derived from the observed feedback patterns. It does not claim a proven root cause and makes no financial projections.

Success metric: Share of delivery-related feedback mentioning delay.

Data limitations

• No timestamps available: trend analysis is disabled by design.

• The current dataset contains no customer identifiers or timestamps; no individual-level or time-based conclusions can be drawn from it.

• Topics and priorities are model/rule-derived from review text; they indicate correlations and recurring complaints, not proven root causes.

• Duplicate review texts are counted once for topic discovery and fully for volume.
